# About TISOVN

The International School Of Veterinary Nursing was established by Qualified Veterinary Nurses worldwide in response to a growing demand from vet nurse students to receive extended education and training.

Veterinary nurses across the globe recognized that the gap between veterinary nurses and veterinary surgeons is pronounced and to bridge this gap, TISOVN has incorporated units in anatomy, physiology, biology, pathology, surgery, radiology and dentistry just to name a few.

TISOVN is an advanced veterinary nursing school and students will be learning components similar to that of veterinary surgeons. TISOVN students will not only find the courses demanding, with strict assessment and exam due dates but also informative with exceptional content not offered by any other institution.

TISOVN has the leading edge in areas of anatomy, physiology, biology, pathology, radiology, surgical procedures, dentistry and short courses.

TISOVN students are expected to complete clinical cases explain pathology results, to assist in surgical procedures, to conduct clinic meetings, to write up charts and cases, to understand fluids and rates, to understand radiology images, drug dosages and so much more.

TISOVN is not a school for those that only want to restrain animals and to clean out cages. TISOVN is, however, a school for those that want to go beyond what veterinary nurses do, and for those that want to work alongside veterinary surgeons to give optimal client and pet care needs.

If you want to be the best, then you must study with the best and TISOVN doesn't fall short. If you want to be an exceptional, forwarding thinking veterinary nurse that veterinary surgeons need and rely upon, then enrol at TISOVN today.

TISOVN is recognised and accredited by IAPCC

# The Incentive

Students are required to complete the following practical training in order to complete their certification.

Would you prefer your incentive in cash.....

Or card?

Coles Group & Myer Gift Card

To be part of this incentive, vet clinics will be required to advertise their clinics on the TISOVN website for availability, stating which certification they will accept.

Clinics can accept more than one certification.

Vet Directors are also required to complete an agreement form.

This incentive is offered to all veterinary surgeons that are in clinic, in welfare, mobile vets and for vets that have access to animals and clinics.

For more details, or to register
